dog lingers on the shoulder of the highway until the boy catches up with her. Then, untroubled by I he. So how did people like Howard Kalens feel about Chiron? Colman wondered. Did they think they could possess a whole planet? Was that why they erased kids minds and turned them into Stromboli puppets who'd think what they were told to, and into civilians who would say it was okay? But why did the people let them do it? Most people didn't want to own a planet; they just wanted to be left alone to be engineers or run their farms. Because they played along with the rules that said they were. Faced with a question slanted like that, Fallows could only reply, "Well... no, I suppose not." "next year covered." Jay shrugged. "Maybe she's scared. Out in the dark, I mean." Stormbel drew his automatic and leveled it at Ramisson's back. "You have one warning," he called out. Ramisson kept walking. Stormbel fired. Ramisson staggered to an outburst of horrified gasps and then collapsed to lie groaning in the aisle. Stormbel replaced his gun calmly in his holster, then raised his hand to address the guards. "Remove that man, and see to it that he receives medical attention." Two SDs moved forward, hoisted Ramisson up by his armpits, firmly but without undue roughness, and carried him out while two others opened the doors then closed them again and resumed their positions. Smooth inlays, cold to the touch, must be worked silver, turquoise, carnelian, malachite, onyx. A currency was introduced and declared the only recognized form of tender. All goods brought into Phoenix were subjected to a customs tariff equal to the difference between their purchase cost and the prevailing price of Terran equivalents plus an import surcharge, which meant that what anybody saved in Franklin they paid to the government on the way home. Terran manufacturers thus lost the advantage of free Chironian materials but gained a captive market, which they needed desperately since their wares hadn't been selling well; and the market could be expected to grow substantially when the whole of Franklin came to be annexed, which required no great perspicacity to see had to be not very much further down Kalens's list of things to bring about. The Terran contractors and professionals were less fortunate and raised a howl of protest as Chironians continued cheerfully to fix showers, teach classes, and polish teeth for nothing, and an additional bill had to be rushed through making it illegal for anyone to give his services away. In response to this absurdity the skeptical Terran public became cynical and proceeded to deluge the courts, already brought to their knees by Chironians queuing up in grinning lines of hundreds to be arrested, with a flood of lawsuits against anyone who gave anyone a helping hand with anything, and a group of lawyers' wives staged their own protest by drawing up a list of fees for conjugal favors. still churned Leilani, and the rotten-sour sludge of scent that pooled on the wall-to-wall gave her another. studied her torso. No boobs yet. She hadn't expected any dramatic change, just perhaps vague swellings, long-ago leak, all vaguely resembling large insects. Sunlight had bleached the drapes into shades no. As she passed behind the girl's chair, Geneva paused and put her hands on Leilani's slender shoulders. The Korean craftsman who had fashioned the piece had probably led a simple and uncomplaining life, Kalens thought to himself, and would have died satisfied in the knowledge that he had created beauty from nothing and left the world a richer place for having passed through. Would his descendants in the Asia of eight hundred years later be able to say the same or to feel the same fulfillment as they scrambled for their share of mass-produced consumer affluence, paraded their newfound wealth and arrogance through the fashion houses and auction rooms of London, Paris, and New York, or basked on the decks of their gaudy yachts off Australian beaches? Kalens very much doubted it. So what had their so-called emancipation done for the world except prostitute its treasures, debase its cultural currency, and submerge the products of its finest minds in a flood of banal egalitarianism and tasteless uniformity? The same kind of destructive parasitism by its own masses, multiplying in its tissues and spreading like a disease, had brought the West to its knees over half a century earlier. surefooted dog at once adapts to this abrupt change in the terrain, but because Curtis is not fully attuned. On the nightstand, in front of a clock radio, lie several coins and a used Band-Aid with a blot of dried. "What about when he was screwing the country?" "Who said that originally? Thomas Jefferson? Abe Lincoln?" rousing the farmer and his wife. "The half that's left is off-limits," Micky declared. "The only pie in play is my piece." Everybody looked inquiringly at everybody else, but there was apparently nothing more to be added for the moment. At last Colman rose to his feet. "Then I guess the sooner we get moving, the more chance we'll have of figuring out all the angles." The others in the room got up by ones and twos from where they had been sitting. Colman, Lechat, Bernard, and Celia gathered by the door in preparation to leave, while the others moved across to see them on their way, with Veronica clinging to Celia's arm. Jay grinned, just a trifle sheepishly. "Er. . . would you get mad if I asked Steve to come along too?".But the descendants of that seed would return and populate Earth once again. In six months the refitting of the ship would be completed, and it would plunge once more into the void to make the first exploratory voyage back, a voyage which would require less than a third of the time of the outward journey. Lechat would be the Mission Director, Fallows the Chief of Engineering, and Adam would head one of the scientific teams, Colman would be returning 'too, as an Engineering officer; Kath would fulfill her dream of seeing Earth; and Alex would be about Jay's age by the time they returned to Chiron. The Chironian scientists had not so much advanced past theft terrestrial counterparts; rather, as perhaps was not surprising in view of the absence on Chiron of traditional habits of thought or. authorities whose venerable opinions could not be challenged until after they were dead, they had gone off in a totally unexpected direction. And some of the things they had stumbled across on theft way had left Pernak astounded.."And-thanks for the valves," Jay said. "They fit perfectly." "How's it coming along?".you are." "We're no more splat in the middle of Forrest Gump than we.When the others had gone, Ceilia sank back in her chair and started brooding again. For the first time in twenty years she felt lonely and truly far from Earth. As a young girl growing up during the rise of the New Order in the recovery period after the Lean Years, she had escaped the harsh realities of twenty-first century politics and militarism by immersing herself in readings and fantasies about America in the late Colonial era. Perhaps as a reflection of her own high-born station in life, she had daydreamed herself into roles of newly arrived English ladies in the rich plantations of Virginia and the Carolinas, with carriages and servants, columned mansions, and wardrobes of dresses for the weekend balls held among the fashionable elite. The fantasies had never quite faded, and that was probably why, later, she had found a natural partner in Howard, who in turn had identified her with his own ideals and beliefs. In her private thoughts in the years that had passed since, she often wondered if perhaps she had seen the Mission to Chiron as a potential realization of long-forgotten girlhood dreams that could never have come true on Earth..Leaning forward from the pillows, old Sinsemilla Cleopatra spoke with a smiling insistence that Leilani.Currently, no vehicles are either entering or leaving the lot. Sirocco had informed Colman and Hanlon that Stormbel had seized command of the Army and was backing Sterm, and that Sterm appeared to be holding together the bulk of what Was left of the Army by appealing to fears among the senior officers that the assassination of Kalens might represent a new general threat from the Chironians.."I never realized," Geneva said miserably. "Stay there, Bret, and don't let anyone touch anything. I'll get onto Brigade right away. We'll have some more people over there in a few minutes." He returned to Colman. "Get two sections out of bed, and have one draw equipment and the other standing by. And get an ambulance and crew over there right away for Emmerson and Crealey." "Army logic," Colman murmured.. "So if he killed all those people," Micky asked, "why's he still walking around loose?" Bernard, now a little calmer with the change of subject, picked up his glass again, took a sip, and shook his head. "Aren't you overreacting just a little bit, Jerry? Exactly what kind of trouble are you talking about? What have we seen?" He looked from side to side as if to invite support, "One idiot who should never have been allowed out of a cage got what he asked for. Fm sorry if that sounds like a callous way of putting it, but it's what I think. And that's all we've seen." "You really wanna know?" An intense note had come suddenly into Driscoll's voice..A hand slid across his mouth from behind, and he was quickly whisked into the still-room next to the pantry. An arm held him in an iron grip while a soldier in battledress scooped the trolley in from the corridor and closed the door. There were more of them in there, with a civilian. "How long before the Kuan-yin is eclipsed?" Stern asked, looking across at Stormbel, who was supervising the preparations to detach. He had intended taking advantage of the Mayflower II's cover until after the strike was launched, but the unexpected loss of the rest of the ship, coupled with Lesley's treacherous change of sides in the hexagon and the arrival of assault troops outside the Battle Module itself had forced him to revise his priorities. There would be lime point in destroying the Kuan-yin if he lost the Battle Module in the process..By their very presence, however, the cowboys have won allies for Curtis. As the crouching boy." "Ghosts in your head," Bernard said. "Come on, Jerry, you're a scientist. Where's your evidence? Since when have you started believing in things you don't have a shred of anything factual to support?" Charles, in those old Thin Man movies..Most of the adults he knew--the ones over twenty-five or so, anyway--seemed to feel an obligation to be sympathetic toward people like him, who had never experienced life on Earth. From what he had seen he wasn't sure that he'd missed all that much. Life on the Mayflower II was comfortable and secure with plenty of interesting things to do, and ahead lay the challenge and the excitement of a whole new unknown world. Certainly that was something no one back on Earth could look forward to.. "Oh, yes. I should have thought of that." Lurch about-faced and lurched back to the kitchen. The sound of a door." "I workout."..once, blasting away..Mrs. D and Micky were also worried about Dr. Doom. Of course he was a more serious case than old." "I pretend to," Leilani said quietly. "Around Dr. Doom, I play along with his story, all agog over Luki..So that was it! Merrick's blue-eyed boy had let him down, and he needed a replacement. Merrick didn't give a damn about Bernard's qualities as an engineer; he was interested only in extricating himself from what was no 'doubt an embarrassing predicament, As Bernard thought back over the deviousness that he had listened to since he sat down, his memory of Kath's frankness and openness, even to a stranger, came back like a breath of fresh air. "You can stuff it," he heard himself say even before he realized that he was speaking..This time, Micky resisted being charmed. A sharp rat-tat-tat sounded from the house behind as Sirocco nailed up a notice declaring it to be confiscated and now government property. A crowd of thirty or more Terrans, mostly youths, looked on sullenly from across the street, watched by an impassive but alert line of SDs in riot gear. This time the Terran resentment was not being directed against the Chironians.. "I'm not interested in anything like that. I just want to hear about someone who lived there and came from there. "So what is it they've got?" Colman asked again. "Missiles wouldn't be any use to them, and they know it. The Mayflower II could stop missiles before they got within ten thousand miles. And beam weapons on the surface wouldn't be effective firing up

through the atmosphere." He spread his hands imploringly. "All they've got in orbit are pretty standard communications relays and observation satellites. The moons are both out of range of beam projectors.
