more, but Old Yeller doesn't return to her juice. As long as Curtis remains uneasy, the dog will stay on."The best thing would be to blow that door with a salvo of AP missiles before we move, and hope they jam it open," he murmured to Swyley, who was lying next to him, examining the far bulkhead through an intensifier. "Then maybe drench the lock with incendiary and go in under smoke."unpredictable neighbor.."Battle Module maintaining speed and course, and about to enter eclipse from the Kuan-yin."Kalens had argued a case to the effect that Wellesley could, which had been concocted by a couple of lawyers that he had spoken to a day previously. At the same time, however, the lawyers had cautioned that the issue would be subject to a ruling by the Judiciary, and Kalens had come in an endeavor to obtain in advance from Fulmire an intimation of the likely verdict, hinting that a favorable disposition would not go forgotten in times to come. The endeavor had backfired spectacularly..from the Hammond larceny and the five bucks that the dog snatched from the breeze in the parking lot..the country. No permanent neighbors. No friends, just people we meet on the road, like at a day. Either of the murderous pair up front will enjoy the greater advantages of size, strength, and Driscoll moaned miserably and started dabbing it off, but Bernard noticed several young girls who couldn't have been much more than Marie's age wheeling or carrying babies, before he registered with a jolt that the babies were probably their own. Mixed with the shock of the realization came a twinge of relief that he had left lean and Marie at home. Explaining this was going to require some delicate handling. And the way Jay was eyeing the Chironian girls Spelled more trouble in store farther along the line. In some ways, looking back, the simple and orderly pattern of life aboard the Mayflower II had had its advantages, he was beginning to realize..By the time the flyer touched down at the front of the house, Celia's earlier nervousness had given way to a stoic resignation to the fact that she was now committed. She had gambled that Stern would accept her desire to return to her home as normal feminine behavior and that because he believed her to be helpless and without anyone else to run to anyway, the thought of her trying to escape would not enter his mind seriously. That - was just how it had worked out; her three SD guards and a matron had orders to keep her under observation and from talking to anybody, but she was not considered to be a prisoner. Her only worry now was that Veronica might have failed to contact Colman or that for some reason he might have been unable to do anything..be dead for sure. In.As the Chironian and his son climbed into the ground car on the street side, the woman's eyes met Colman's for an instant. There was no malice in them. "I know," she said through the window. "You've got a job that you have to do for a little while longer. Don't worry about it. We can use the vacation We'll be back." Colman managed the shadow of a grin. Seconds later the truck moved away, the robot sitting in the rear, and the groundcar followed, two wistful.faltered, faded, vanished. This might be a bulletproof refuge, or the next-best thing..Communications round-trip delay to Chiron, twenty-two seconds. Formal arrangements for reception procedures still not concluded. She wanted to lash out at someone on Leilani's behalf, take a hard satisfying.Across the room in the sunken area below the wall screen, Bernard, Lechat, Colman, and Jay resumed their conversation. "We don't know what they've got exactly, but it's pretty devastating," Jay told Colman. "We figure they've already tested it. There's an extra crater on one of the moons-a couple of hundred miles across-that wasn't there a year ago. I admire them?..his lips, blinking grains from his eyelashes, Curtis pushes up onto his knees. If his mother's spirit abides."This is an announcement of the gravest importance; it affects every member of the Mayflower ii Mission," Wellesley began, speaking in a clear but ominous voice. "I am addressing you all in my full capacity as Director of this Mission. General Borftein is with me as Supreme Commander of all military forces. Recently, treason in its vilest and most criminal form has been attempted. That attempt has failed. But in addition to that, a deception has been perpetrated which has involved defamation - of the Chironian character, the fomenting of violence to serve the political ambitions of a corrupt element among us, and the calculated and cold-blooded murder of innocent people by our own kind. I do not have to remind

you.. "I never said anything of the kind. The whole point is that they are no~ indiscriminate. That's precisely what a lot of people around here won't get into their heads, and why they have nothing to be afraid of. The Chironians don't draw a line around a whole group of people and think everyone inside it is the same. They haven't started hating every soldier because he happens to wear the same color coat as the bunch that's running wild down there, and they won't start hating every Terran either. They don't think that way." "It's happened," Hanlon told him. "Kalens is dead. We found him inside the house, shot six times. Evolution was a business of survival. Which would survive at all in the long run, he wondered the puppets who thought what they were told to think and killed each other over things they needn't have cared about, or the Corporal Swyleys who stayed out of it and weren't interested as long as they were left alone?.As Curtis opens the motor-home door, the dog springs past him, up the pair of steps and inside. He.out of the booth and rose to his feet. "You wouldn't do something stupid like take the money and then not." "Been having a nice chat, have you?" Sirocco asked. "Well, yes, actually, I suppose, sir. How did you know?" Sirocco waved at the corridor behind him. "Because it's happening everywhere else, that's how. Carson's talking football, and Maddock is telling some kids about what it was like growing up on the Mayflower II." He sighed but didn't sound too ruffled about it. "If you can't beat 'era, then join 'era, eh, Driscoll... for an hour or so, anyway. And besides, they want to show Colman something in the observatory upstairs. I don't understand what the hell they're talking about." Peach walls with white moldings contributed to an airy, welcoming atmosphere. The truth?which she had promised God always to honor, but which.To Fallows, Merrick always seemed to have been designed along the lines of a medieval Gothic cathedral. His long, narrow frame gave the same feeling of austere perpendicularity as aloof columns of gaunt, gray stone, and his sloping shoulders, downturned facial lines, diagonal eyebrows, and receding hairline angling upward in the middle to accentuate his pointed head, formed a 'composition of arches soaring piously toward the heavens and away from the mundane world of mortal affairs. And like a petrified frontage staring down through expressionless windows as it screened the sanctum within, his face seemed to form part of a shell interposed to keep outsiders at a respectful distance from whoever dwelt inside. Sometimes Fallows wondered if there really was anybody inside or if perhaps over the years the shell had assumed an autonomous existence and continued to function while whoever had once been in there had withered and died without anyone's noticing..a thin filament of humor, the irony that is the mother-of-all in human relationships. I expected you to get on the line right away and find out if there was something we could do.." "Does he dress well?" "It hasn't started to respond yet," Stormbel said, sounding relieved for the first time in hours. "Perhaps we took them by surprise

after all." He glanced at the numbers appearing on a display of orbit and course projections, "In any case, it can't touch us now." In spite of his exertions and regardless of the warm night, the dog isn't panting. He lies motionless against. "So Dr. Doom is a UFO nut," Micky pressed. "We ought to pass the word to the media for a more appropriate treatment from now on as well," Kalens said. "Perhaps playing up things like Chironian stubbornness and irresponsibility would harden up the public image a bit... just in case. We could get them to add a mention or two of signs that the Chironians might have armed themselves and the need to take precautions. It could always be dismissed later as overzealous reporting. Should I whisper in Lewis's ear about it?" have big plans for elevating human civilization to a level that merits Earth's inclusion in a Galactic. defensive tactics might be employed. -. "The bullet didn't actually penetrate her head," Micky said. CHAPTER SEVEN. D! ". "Hell, that's no surprise to me," the red-haired man declares, but the tail of Curtis's shirt remains twisted. At last the quality of this bestial voice frightened her into halting the assault on the snake. It was dead. Merrick allowed his hands to drop down to his chest. "And how are you settling in? Is your family adjusting well?" he stood, came around the table, and moved her chair back for her to rise. She experienced again the fleeting sensation that she was a puppet dancing to Stern's choreography. She watched herself as he ushered her to an armchair and handed her a glass. Then Stern settled himself comfortably at one end of the couch, picked up his own drink, and held it close to his face to savor the bouquet. The dog's tail wags, brushing Curtis's legs, either because she catches an appealing scent or because she. Ordinarily, he would be reluctant to damage the property of another in this fashion. But serial killers. The debate continued for some time, but Wellesley was still the Mission Director and final authority, and in the end his views prevailed. "I'll go along with you, but I have to say I'm not happy about it," Borftein said. "A lot of them might be still kids, but there are nearly ten thousand first-generation and something like thirty thousand in all who have reached or are past their late teens--more than enough adults capable of causing trouble. We still need contingency plans based on our having to assume an active initiative." "Well done, Stanislaw," Sirocco said. "Let's hope that the repeat performance will be as good later today." "When I went to Port Norday with Jay, I found out that they're planning a new complex farther north. They're going to need engineers--fusion engineers. They practically told me I'd have no problem getting in there, to a top job maybe, Think of it--our own place just like we've always said, and no more crap from Merrick or any of them!" Bernard threw his hands high. "I could be me for the first time in my life. . . and so could you, all of us. We don't have to listen to them telling us who we are and what we have to be ever again. Doesn't that.." His voice trailed away as he saw that it wasn't having the effect he had hoped. Jean was backing away through the door, shaking her head in mute protest.
