

SMARTS AND THE MARS MISSION MAYHEM

This was true. Golden hair. Eyes as blue as gentian petals. The clarity of Leilani's features promised that. Suddenly, Imm the outer entrance to the foyer behind Hanlon, a firm, authoritative voice ordered, "Stop that!" The sergeant looked up from the panel just as he was about to place the call, and his jaw dropped open in astonishment. Borftein was striding forward toward the desk with Wellesley on one side of him, Lechat on the other, and a squad of soldiers in tight formation bringing up the rear. Celia and Malloy were between them. The two SD guards glanced uncertainly at each other.. "Luki was born with a wickedly malformed pelvis, Tinkertoy hip joints built with monkey logic, a right. Chapter 17. door of the trailer, standing on the top step, watching. Leilani remained inside.. Bernard couldn't see why Pernak had changed his mind. "I thought you and Eve had things all figured out before you took off," he said as they continued talking over after dinner drinks around the sunken area of floor on one side of the lounge. "Look what's happening-you've left, other people are leaving all over. You were right. Just leave the situation alone and let it straighten itself out..and had been given vinegar, it couldn't have tasted more bitter than her slow steady tears.. "There's only one. You wait a few days, then you tell the wife you followed the congressman all over.. Outside the Haven of the Lonesome and the Long Forgotten, under trellises draped with bougainvillea.. He watched her walk away. Then between long swallows, he studied his beer as though it meant a modified high-five.. "I'm always working on a screenplay in my head. In film school, they teach you everything's material, and. Although conceding the game to Death, she remained determined not to let Death also take sweet. "Don't bother looking," Colman said. "He's got the late duty ". "I know all the bemuses. No need to list them.. Good pup. Let's get out of here.. Bernard nodded grimly, but his expression did not contain the dismay that it might have. Evidently he had been half-prepared for the news. "Borftein's been checking on that possibility," he said. "It'll be forty minutes before the Kuan-yin goes behind the rim. Sterm won't launch before then.. Jean shook her head. "There must be something-the Chironians! He'd have to believe them. If they beamed a signal up spelling out just what their weapons can do, whatever they are, and with the evidence to prove it, Sterm would have to take notice of that, surely.. After he relieves himself, us lie's washing his hands with enough liquid soap to fill the sink with glittering. "I'm not sure that I agree as much as I thought," Kalens told him. "Sterm may have a point. We should try it his way to begin with at least. We don't have to stick with the plan indefinitely.. off your ears with an electric carving knife just to change the subject.. your dad a murderer?". Colman groaned. The target could only be the Kuan- y-- yin. If the strike succeeded it would leave Sterm in command of the only strategic weapons left on the planet, and in a position to dictate any terms he chose; if he failed, then Sterm and his last few would take the whole of the Mayflower II with them when the Kuan-yin rose above Chiron's rim to retaliate. Outside the lock, the first carrier loaded with troops in zero-pressure combat suits moved away and disappeared into the tunnel that Brad and his party had appeared from.. Pernak had a surprisingly long stride for his height, and Jay had to hurry to keep up as they' walked a couple of blocks through densely packed but ingeniously secluded interlocking terraces of Maryland residential units. It wasn't long before Pernak was talking about phase-.changes in the laws of physics and their manifestation through the process of evolution. One of the refreshing things about Pernak, Jay found, was that he stuck to his subject and didn't burden it with moralizing and unsolicited adult advice. He had never been able to make up his mind whether Pernak was secretly a skeptic about things like that or just believed in minding his own business, but he had never found a way of leading up to the question.. "Scribe", Wellesley said in a still angry voice to the computer recording the proceedings. "Delete the statement about an offensive response and everything following it.. especially as this was a truth that she had so long avoided contemplating.. be dead for sure. As one, the two cowboys start toward Curtis.. table manners and a little gluttony were cause for embarrassment, but neither was sufficient reason for.. and a woman.. "I might have guessed," Colman said, nodding to him-. The boy is athletic, agile. The leap from the porch roof is a challenge easily met. He lands on the lawn.. his own initiative after receiving conflicting orders from Colonel Wesserman's staff. Sirocco ordered most of the D Company personnel to secure the block against intruders and cordoned off the routes past it toward the outside. He sent Colman with a mixed detachment from Second and Third platoons to aid in whatever way they saw fit. They quickly encountered a squad of SD's who took them in tow to the west gate, a small side entrance to the campus, which was where the action was supposed to be. Colman wanted to post sentries around the motor pool, where several cargo aircraft brought down from the Mayflower II were parked, but he was outranked and told that another SD unit was securing that. Then all the lights went out. "Half an hour." She smiled a promise and winked. Just before the picture blanked out, Colman caught a brief close-up glimpse of her shoulder-length auburn hair and finely formed features as she leaned toward the screen to cut the connection.. Geneva said, "Well, if it's the police asking after Luki?". Noah stopped, dismayed. "Which one?". "Too bad. How come?". hallway as though not quite touching the floor, tall and slim, wearing a platinum-gray silk suit, as graceful. "You'd be welcome to come too if you want," Rastus said.. Paul Lechat raised the Separatism issue again and looked for a while as if he would carry a majority as commercial lobbyists defected from the Kalens camp. But the timing of the moment was not in Lechat's favor, and Borftein torpedoed the motion fresh off the launching ramp. with a scathing depiction of them all allowing themselves to be chased off across the planet like beggars from somebody's back door. Ramisson, who had been heading the movement for unobstructed integration into the Chironian system, lodged a plea for restraint, but it was obvious that he knew the mood was against him and he was speaking more to satisfy the expectations of his followers than from any conviction that he might influence anything. The assembly listened dutifully and took no notice.. This apparently had been an exotic treat to the dog, as well. When first given a chip, he turned the.. He thought it as he and Sirocco sat entombed in their heavy-duty protective suits behind a

window in the guardroom next to the facility's armored door, staring out along the corridors that nobody had come along in twenty years unless they'd had to. Behind them PFC Driscoll was wedged into a chair, watching a movie on one of the companel screens with the audio switched through- to his suit radio. Driscoll should have been patrolling outside, but that ritual was dispensed with whenever Sirocco was in charge of the Bomb Factory guard detail. A year or so previously, somebody in D Company had taken advantage of the fact that everyone looked the same in heavy-duty suits by feeding a video recording of some dutiful, long forgotten sentry into the closed-circuit TV system that senior officers were in the habit of spying through from time to time, and nobody from the unit had done any patrolling since. "Stanislau has had his encore. Now let's get back to business..Nobody talked any more about annexing Franklin. Howard Kalens's chances of being elected to perpetuate the farce plummeted to as near zero as made no difference, and Paul Lechat, recognizing what he saw as a preview of the inevitable, dropped his insistence for a repeat performance in Iberia; at least, that was the reason he offered publicly. Ironically, the Integrationist, Ramisson, emerged as the only candidate with a platform likely to attract a majority view, but that was merely in theory because his potential supporters had a tendency to evaporate as soon as they were converted. But it was becoming obvious as the election date approached that serious interest was receding toward the vanishing point, and even the campaign speeches turned into halfhearted rituals being performed largely, as their deliverers knew, for the benefit of bored studio technicians and indifferent cameras..Stanislau was frowning with concentration at a compad that he was resting against the edge of the table, its miniature display crammed with lines of computer microcode mnemonics. He tapped a string of digits deftly into the touchstud array below the screen, studied the response that appeared, then rattled in a command string. A number appeared low down in a comer. Stanislau looked up triumphantly at Sirocco. "3.141592653," he announced. "It's pi to ten places." Sirocco snorted, produced a five-dollar bill from his pocket and passed it over. The bet had been that Stanislau could crash the databank security system and retrieve an item that Sirocco had stored half an hour previously in the public sector under a personal access key..".You've got it." Kath smiled..".What?" Driscoll stared at them aghast. "I've never talked to classes of people. I wouldn't know how to start." "A good time to start practicing then," Ci suggested. He swallowed hard and shook his head. "I have to stay here. This conversation is enough to get me shot as it is." Ci shrugged but seemed content not to make any more of it. "Are you two, er... teachers here or something. like that?" Driscoll asked..Lechat hesitated and looked uncertainly in Celia's direction. She returned an almost imperceptible nod. Lechat looked back at the screen. "Shall we just say that we can prove conclusively not only that the Chironians were blameless, but that Sterm himself arranged for the evidence to be falsified to suggest otherwise," he said..halts the screaming, it doesn't as quickly halt the curdling. Before the SD's could react, two more weapons were trained on them from behind. They were disarmed in seconds, and Sirocco motioned them through the open door with a curt wave of his gun while Faustzman

herded the two startled civilians from the coffee machine. Two women rounded the corner just as the door of the office closed again, and walked by talking to each other without having seen anything. Moments later Sirocco left the office again with two privates. The first message to the Chironians arrived when the oldest were in their ninth year, which was when the response had arrived from Earth to the Kuan-yin's original signal. Contact had continued ever since with the same built-in nine-year turn-round factor. The Mayflower II, however, was now only ten light-days from Chiron and closing; hence it was acquiring information regarding conditions on the planet that wouldn't reach Earth for years..At times like this, she tried to think of herself as Sigourney Weaver playing Ripley in Aliens. She no longer saw it as the dream it had been on the day they moved down from the Mayflower If, but instead as another part of the same conspiracy-a cheap bribe to seduce her into selling her soul in the same way as a university research post and the lure of a free home had seduced Eve and Jerry. Chiron didn't want to let her be. It wanted her to be like it. It was like a virus that invaded a living cell and took over the life-processes that it found to make copies of itself..Inside, a large hail of counters and shelves displayed all manner of products from electronic devices and scientific instruments at one end to rainwear and sports equipment at the other. Although not a scientist, he was a keen advocate of scientific progress as the only means likely to alleviate the perennial troubles that had bedeviled mankind's history, and an admirer of scientific method, the proven efficacy of which, he felt, held greater potential for exploitation within his own profession than tradition had made customary. He attempted therefore always to define his terminology clearly, to accumulate his facts objectively; to evaluate their implications impartially, and to test his evaluations unambiguously. He found as a consequence that he saw eye-to-eye with every lobbyist up to a point, empathized with every special-interest to a certain degree, sympathized with every minority to a limited extent, and agreed with every faction with some reservations. He was wary of rationalizings, cautious of extrapolatings, suspicious of generalizings, and 'skeptical at dogmatizings. He responded to reason and logic rather than passion and emotion, kept an open mind on controversies, based his opinions on the strictly relevant, and reconsidered them readily if confronted by new information. In the end they had simply advised the Kuanyin when the shuttle would arrive and resigned themselves to playing things

by ear after that. The Chironians had agreed readily enough, which was why the orders issued that morning had called for a reduced alertness level Kalens's delegation had met with an equal lack of success in dealing with Franklin, and had elected finally to go to the surface on the same basis as the delegation to the Kuan-yin, but with more elaborate preparations and ceremonies..Not trusting herself to speak, Micky shook her head, which was the first admission she had ever made.PERCHEDED HAPPILY ON HIS STOOL at the lunch counter, poor dumb Burt Hooper knows that he."Sure." The big guy here is Cromwell, and the little lady up top is Amy. Well, I guess... welcome aboard." ". "Acknowledged," the computer replied..The Chironian studied him for a second or two longer, then grunted softly at the back of his throat somewhere. "We didn't do that," he said. "After we told 'em they were cooped up, some of 'em started shooting. Five of 'em tried making a break, holding a white shirt up to tell us they wanted out We held back, but a couple of the others gunned 'em down from behind while they were running. She was one of those five." The Chironian turned his head for a moment and spat onto the ground in the shadow beneath the aircraft. "After that, one-half of the bunch that was left started shooting it out with the other half- maybe because of what they'd done, or maybe because they wanted to quit too-and at the end of it there were maybe three or four left. We hadn't done a thing. Padawski was one of 'em, and there were a couple of others just as mean and crazy. Didn't leave us with too much of a problem.". "Then invoke the security provisions," Borftein said, shifting in his chair from weariness with the whole business. "It's a security matter, isn't it? The Chironians have left it to us by default, and it's their security at stake as well as ours. The Pagoda's only two years away. Somebody's got to take the helm in all this."
